

Hamilton12 Australian Shares Income Fund

AS AT 31 JULY 2025

Calculated by
**S&P Dow Jones
Indices**

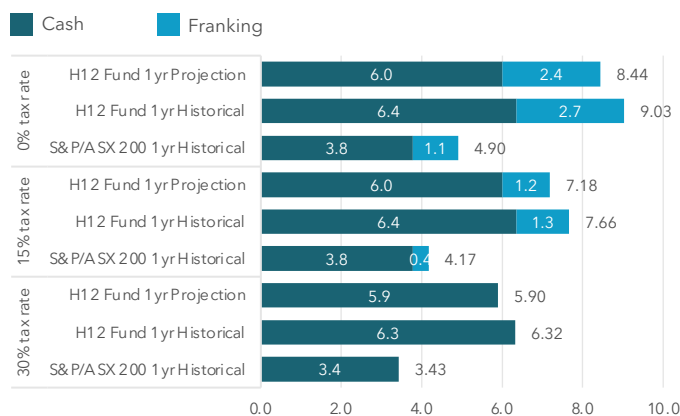

INVESTMENT STRATEGY AND OBJECTIVE

The Fund invests in ASX listed shares and adopts the same evidence-based, systematic investment strategy as the S&P Dow Jones Indices calculated [Hamilton12 Australian Diversified Yield Index](#) (H12ADYI). The portfolio aims to generate long-term after-tax returns in excess of the Benchmark after fees, including an annual gross dividend yield that exceeds the gross dividend yield of the Benchmark.

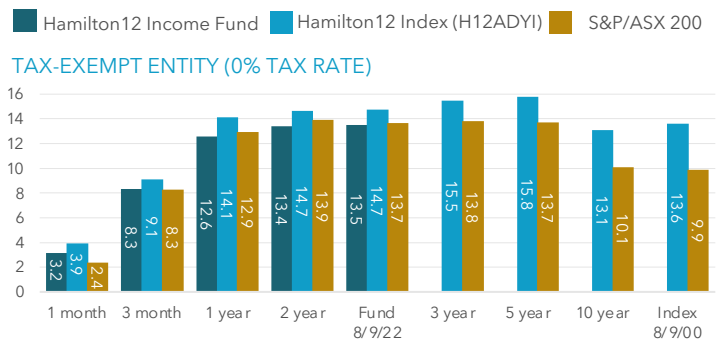

ABOUT HAMILTON12

Established in 2017, Hamilton12 is an active systematic investment manager designing evidence-based strategies to deliver low-cost, positive risk-adjusted returns. Prioritising after-tax returns, fee minimisation, and tax efficiency, we leverage academic research and advanced financial methods to provide innovative, robust, and transparent solutions. Our disciplined, rule-based approach removes emotional biases, ensuring consistent, rational decisions grounded in modern finance principles to achieve above-benchmark performance.

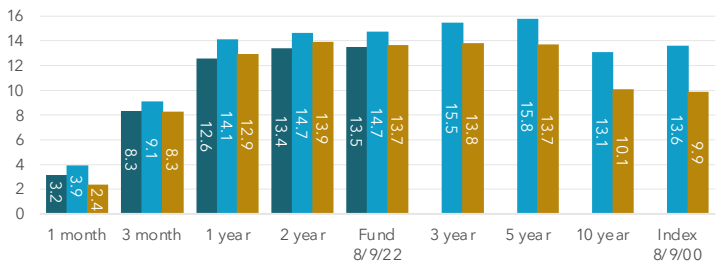

AFTER-TAX DIVIDEND YIELD¹ (%)

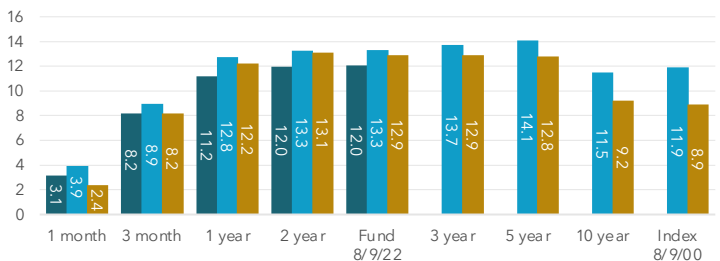

PERFORMANCE AFTER FEES³ (%)

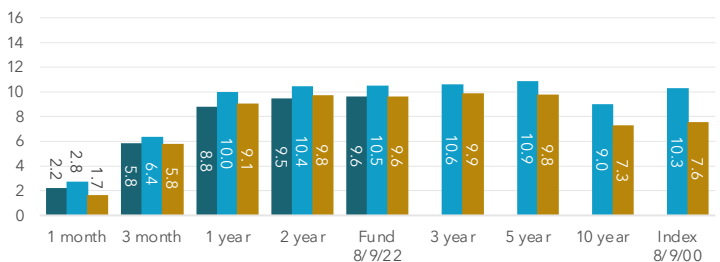

TAX-EXEMPT ENTITY (0% TAX RATE)

SUPER FUND PRE-RETIREMENT (15% TAX RATE)

COMPANY ENTITY (30% TAX RATE)

PERFORMANCE COMMENTARY²

Our systematic approach prioritises high franked dividend yields and sector diversification, which naturally results in a value orientation without explicitly targeting it. Recent fund performance has aligned with expectations and positions investors well for future fluctuations. Historically, this strategy has helped mitigate losses during downturns and supported faster recoveries, as shown in the [Risk table on page 2](#).

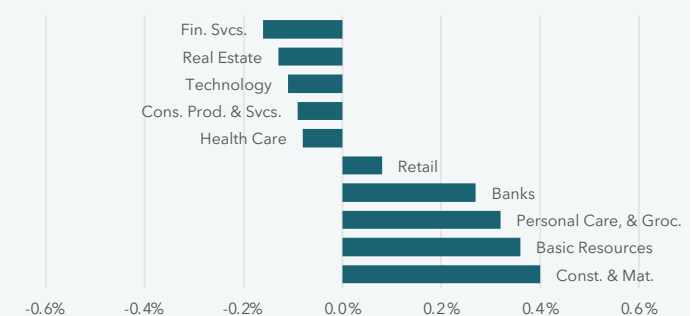

Our monthly commentary highlights consecutive periods of performance. Over the two months to July 2025, the fund outperformed the S&P/ASX 200. Growth stocks led the market, with the MSCI Australia Growth Index returning 4.4%, compared to 2.6% for the MSCI Australia Value Index – a 1.9% difference.

Key contributors to relative performance were Construction and Materials (+0.4%), Basic Resources (+0.4%), and Personal Care, Drug and Grocery Stores (+0.3%). Within Construction and Materials, overweight positions in Downer EDI (+14%), Brickworks (+19%), and Ventia (+10%) each contributed 0.1%. In Basic Resources, the fund's decision not to hold Northern Star (-22%) added 0.3%. In the Personal Care sector, an overweight in Metcash (+19%) contributed 0.2%.

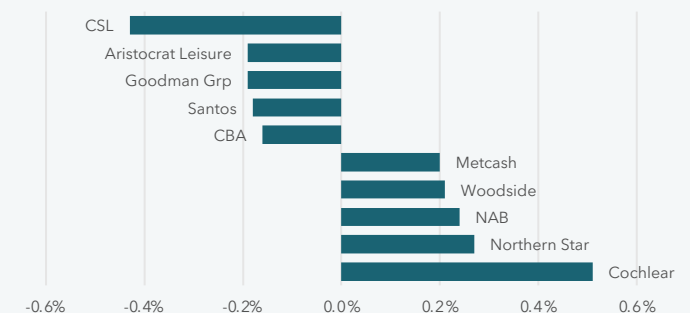

At a stock level, the largest positive contributor was an overweight in Cochlear (+15%, +0.5%). This was offset by not holding CSL (+10%), which detracted 0.4%, resulting in Health Care being a neutral contributor overall.

While short-term attribution provides insight into monthly movements, the strategy remains focused on its core objective: delivering a consistently higher yield than the benchmark – without compromising total returns over the medium to long term. This continues to support stronger after-tax outcomes for investors.

ICB SUPERSECTORS

STOCKS

1. After-Tax Dividend Yield, including accrued but undistributed income, reflects the dividend yield combined with the net tax benefit over the trailing 12 months of net dividends for securities held by the trust. The one-year projected yield is derived from an estimated buy-and-hold dividend yield based on analyst dividend projections, plus intra-year rebalancing of approximately 50% of the portfolio and 95% franking.

2. Performance commentary focuses on periods of consecutive overperformance or underperformance. There are 11 ICB Industries, 20 ICB Supersectors, 45 ICB Sectors and 173 Subsectors compiled by FTSE Russell.

3. Performance figures include franking credits, are calculated after fees have been deducted, and assume dividends have been reinvested. Taxes on capital gains are not accounted for in the computation of after-tax returns for tax-exempt and superannuation fund reporting. Taxes on capital gains are calculated at 30% for the computation of company returns. Returns greater than 1 year are annualised returns. Since inception, assuming first investment on 9 September 2022 for the H12 Australian Shares Income Fund and 8 September 2000 for the H12ADYI and the S&P/ASX200.

CHARACTERISTICS

Number of Holdings	118
% in Top 10 Holdings	47.1%
NAV per A-class unit	\$1.0793
Franking Percentage ⁵	98.36%
Next distribution date ⁶	9 October 2025

FEES AND COSTS

Management Fee	0.60% p.a., exclusive GST
Buy/Sell Spread	+/- 0.20%
Performance Fee	15%, exclusive of GST, of the amount by which the after-tax returns of the Fund exceed the returns of the Benchmark on a quarterly basis.

4. The table is based upon average weights in the Hamilton12 Australian Shares Income Fund at the end of each month for the 12 months at the end of the period, and the corresponding relative market capitalisation of stocks in the S&P/ASX 200. Active share is the sum of absolute differences between Hamilton12 Australian Shares Income Fund weight and S&P/ASX 200 weight, averaged across the six rebalancing dates.

5. The franking percentage indicates the proportion of franking credits received from dividends since the fund's launch for a tax-exempt investor.

6. Next distribution date for payment or reinvestment is subject to change.
